Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty integrating the Machine Learning prediction model with the Flask application.	Tested the integration module separately and fixed configuration issues before integrating it into the main application.
2	Errors caused by missing dependencies and configuration files.	Installed all required packages using requirements.txt and verified the config.py settings.
3	Team members faced issues while combining frontend, backend, and database modules.	Conducted regular team meetings, divided tasks clearly, and integrated each module after successful testing.
