

Demonstration of Proposed Features

Date	11 July 2026
Team ID	SWTID-2026-4350
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User & Applicant Management	Collects and stores applicant personal and financial information in the database.	Implemented	Yes	Working successfully.
2	Loan Approval Prediction	Predicts whether a loan application is approved or rejected using the Machine Learning model.	Implemented	Yes	Prediction generated successfully.
3	Risk Category Classification	Classifies applicants into Low, Medium, or High Risk based on prediction confidence.	Implemented	Yes	Risk category displayed correctly.
4	Database Management	Stores applicant details, credit history, ML model details, and prediction results using SQLAlchemy.	Implemented	Yes	Data stored successfully.
5	Dashboard Analytics	Displays total applicants, prediction statistics, approval/rejection rates, and recent predictions.	Implemented	Yes	Dashboard functioning properly.
6	Machine Learning Model Integration	Integrates the XGBoost/Ensemble model with the Flask application for real-time prediction.	Implemented	Yes	Model integrated successfully.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
