Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to know whether my loan will be approved • I hope the prediction is quick and accurate.. • I entered all my details correctly.	THINKS • Is the prediction model reliable? • What if my application gets rejected? • Can I improve my chances of approval?
PERSONA NAME <i>(Role / User Type)</i>	
DOES • Enters personal and financial details. • Submits the application for prediction. • Checks the approval result and risk category.	FEELS • Hopeful about approval. • Nervous while waiting for results. • Happy if approved.
