

Project Executable Files

Date	01 July 2026
Team ID	SWTID-2026-4350
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	No
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Credit card approval prediction/

```

|
├── app.py
├── config.py
├── requirements.txt
├── src/
│   └── prediction.py
├── templates/
│   ├── home.html
│   ├── index.html
│   └── result.html
└── Database
    ├── User
    ├── ApplicantDetail
    ├── CreditHistory
    ├── MLModel
    └── ApprovalPrediction
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Hosted
Login Credentials (Demo)	admin / admin (Default Seed User)
Platform / Hosting Provider	Flask Development Server
Repository Link	Not Available
Demo Video Link	Not Available

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- Python 3.9 or above
- pip package manager
- Git
- VS Code or any Python IDE
- Minimum 4 GB RAM recommended
- Modern web browser such as Chrome, Edge, or Firefox
- Required Python libraries listed in requirements.txt
- Raw datasets application_record.csv and credit_record.csv must be available in the data/ folder

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Project depends on correct config.py configuration.	Ensure the database and application configurations are correctly defined before running the project.
2	ML prediction requires the trained model and preprocessing files.	Run the complete ML pipeline to generate best_model.pkl, scaler.pkl, encoders.pkl, and feature_columns.pkl before launching the application.
3	Raw datasets and HTML templates are required in their correct directories.	Place the CSV files in the data/ folder and all HTML files in the templates/ folder before execution.
